Serving Hearing Impaired Children

In Fujian Province China

Fujian New Hope Recovery Center—Minhou

- Located just 15 minutes from Fuzhou, Fujian's capital
- An Auditory Oral Language Acquisition Program for hearing impaired children between the ages of three and seven
- Where hearing impaired children are encouraged to understand and use spoken Chinese to communicate
- At the end of this program, the children may be ready to transition into a regular elementary school with special accommodations

Child Sponsorship Program

A monthly gift will help sponsor a hearing impaired child at Fujian New Hope Recovery Center—Minhou. In a loving, residential environment the children receive:

- Specialized speech, language, and listening skill training
- Preschool instruction
- Hearing health care services
- Residential accommodations & supervision
- Security

Fujian Hearing Project

The Fujian Hearing Project is an ongoing two-stage intervention providing free hearing aids for hearing impaired children from low income families.

- Local & Provincial officials from the China Disabled Persons Federation identify the children for screening
- Volunteer North American hearing health professionals pay their own airfare to Fujian Province to screen the children
- Hearing aids are bought with donations from individuals, corporations, and foundations
- A second team of American and Chinese volunteers fits the children with their free hearing aids

CNI has given free hearing health care and free hearing aids to over 550 children in several Fujian cities including: Fuzhou, Zhangzhou, Samming, Nanping, and Luoyuan. All the work so far has been accomplished by volunteers and by private donations.

Financial Help Needed

CNI depends on the gifts of individuals, foundations, churches and organizations for the financial resources needed to serve these hearing impaired Fujian children from low income families.
